OVERVIEW

This document describes basic configuration to interconnect FCM630A series and FEG4301. In this document, we are using FEG4301 as an example. This is typically applied to the scenario where users would like to add a FEG4301 as an external ISDN trunk.

Warning:

When using the IVR in FCM630A series, please be aware that if "Dial Trunk" option is turned on in IVR settings, the call into the IVR will be able to dial outbound call using FCM630A's trunk. The IVR's permission level will be used when making outbound calls in this case. Please select proper permission level for the IVR to control the outbound calls allowed via "Dial Trunk".

CONNECT FCM630A TO FEG4301 USING PEER SIP TRUNK

Create IVR On FCM630A

On the FCM630A web GUI, create an IVR extension under **Call Features->IVR**.

In IVR settings, if "Dial Other Extensions" is enabled, the calls dialing into the FCM630A IVR will be able to reach the internal extensions registered to the FCM630A. Also, you can assign the "Key Pressing Event" to different destinations.

Create New IVR

Basic Settings Key Pressing Events

* Name:	FEG4301_IVR
* Extension:	7000
Dial Trunk:	<input type="checkbox"/>
Auto Record:	<input type="checkbox"/>
Dial Other Extensions:	<input type="checkbox"/> All <input checked="" type="checkbox"/> Extension <input type="checkbox"/> Meeting <input type="checkbox"/> Call Queue <input type="checkbox"/> Ring Group <input type="checkbox"/> Paging/Intercom Groups <input type="checkbox"/> Voicemail Groups <input type="checkbox"/> Fax Extension <input type="checkbox"/> Dial By Name
* IVR Black/Whitelist:	Disable
Replace Display Name:	<input type="checkbox"/>
Return to IVR Menu:	<input type="checkbox"/>
Alert-info:	None
* Prompt:	welcome <input type="button" value="Upload Audio File"/>
	Add Prompt <input type="button" value="+"/>
* Digit Timeout (s):	3
* Response Timeout:	10
* Response Timeout Prompt:	ivr-create-timeout <input type="button" value="Upload Audio File"/>
* Invalid Input Prompt:	invalid <input type="button" value="Upload Audio File"/>
* Response Timeout Prompt Repeats:	3 <input type="button" value=""/>
* Invalid Input Prompt Repeats:	3 <input type="button" value=""/>
Language:	Default

Figure 1: Create IVR 7000 on the FCM630A

Create Peer SIP TRUNK On FCM630A

On the FCM630A web GUI, create a peer SIP trunk under **Extension/Trunk ->VOIP Trunks**. In this example, the FEG4301 IP address is 192.168.99.237.

Create New SIP Trunk

If the host is not a numeric IP address, but the port number is present in the URI, the FCM performs an A or AAAA record lookup of the domain name. If a domain is configured without a port number, the FCM will do an SRV record lookup.

Type:	Peer SIP Trunk
* Provider Name:	FEG4301
* Host Name:	192.168.99.237
Transport:	UDP
Keep Original CID:	<input type="checkbox"/>
Keep Trunk CID:	<input type="checkbox"/>
NAT:	<input type="checkbox"/>
Disable This Trunk:	<input type="checkbox"/>
TEL URI:	Disabled
CallerID Number:	
CallerID Name:	

Cancel Save

Configure Outbound Rule on FCM630A

On the FCM630A web GUI, go to **Extension/Trunk ->Outbound Routes** to create a new outbound rule. This would allow the extension on the FCM630A to reach numbers in ISDN network via the peer SIP trunk we just configured.

Create New Outbound Rule

General

• Outbound Rule Name: <input type="text" value="FEG4301"/>	Disable This Route: <input type="checkbox"/>
• Pattern:	<input type="text" value="91XXXXXXXXXX"/>
PIN Groups:	<input type="text" value="None"/>
Password:	<input type="text"/>
Local Country Code:	<input type="text"/>

Privilege Level:

Warning: Setting privilege level as "Disabled" will lead to this rule being usable only by a matched Source Caller ID.

Enable Source Caller ID Whitelist

Enable Source Caller ID Whitelist: <input type="checkbox"/>	Outbound Route CID: <input type="text"/>
---	--

Call Duration Limit

Call Duration Limit: <input type="checkbox"/>

Main Trunk

• Trunk: <input type="text" value="SIPTrunks -- FEG4301"/>	Strip: <input type="text" value="1"/>
Prepend:	<input type="text"/>

Figure 3: Configure Outbound Rule on the FCM630A

In this example pattern "91XXXXXXXXXX", 9 is the first dialing digit and it will be stripped off when the call goes out.

Configure Inbound Rule on FCM630A

On the FCM630A web GUI, go to **Extension/Trunk ->Inbound Rules** to create a new inbound rule. Let's say that we have 30 numbers on the PRI starting from 1122334450 to 1122334479. In this example, we create the DID as **11223344XX** to receive calls through all the 30 numbers.

Create New Inbound Rule

<input type="button" value="Cancel"/>	<input type="button" value="Save"/>		
* Trunks:	SIPTrunks -- FEG4301	Inbound Route Name:	FEG4301_Inbound
* Pattern:	11223344XX	CallerID Pattern:	
Disable This Route:	<input type="checkbox"/>	Seamless Transfer Whitelist:	
Alert-info:	None	Ringback Tone:	None
Fax Detection:	<input type="checkbox"/>	Auto Record:	<input type="checkbox"/>
Block Collect Calls:	<input type="checkbox"/>	Prepend Trunk Name:	<input type="checkbox"/>
Set CallerID Info:	<input type="checkbox"/>	Enable Route-Level Inbound Mode:	<input type="checkbox"/>
Inbound Multiple Mode:	<input type="checkbox"/>		
<input checked="" type="radio"/> Default Mode <input type="radio"/> Mode 1			
* Default Destination: IVR FEG4301_IVR			
Time Condition <input type="button" value="Add"/>			

Figure 4: Configure Inbound Rule on FCM630A

The default destination is configured to IVR. Ensure to select the proper extension for the IVR.

Connect FEG4301 with FCM630A

1. On the FEG4301 web GUI, go to the **VoIP->SIP Trunk** page and click on **Add New** button. Then, enter the IP address of the FCM630A that you are peering with in Remote Address. In the following example, FCM630A has IP address 192.168.99.99.

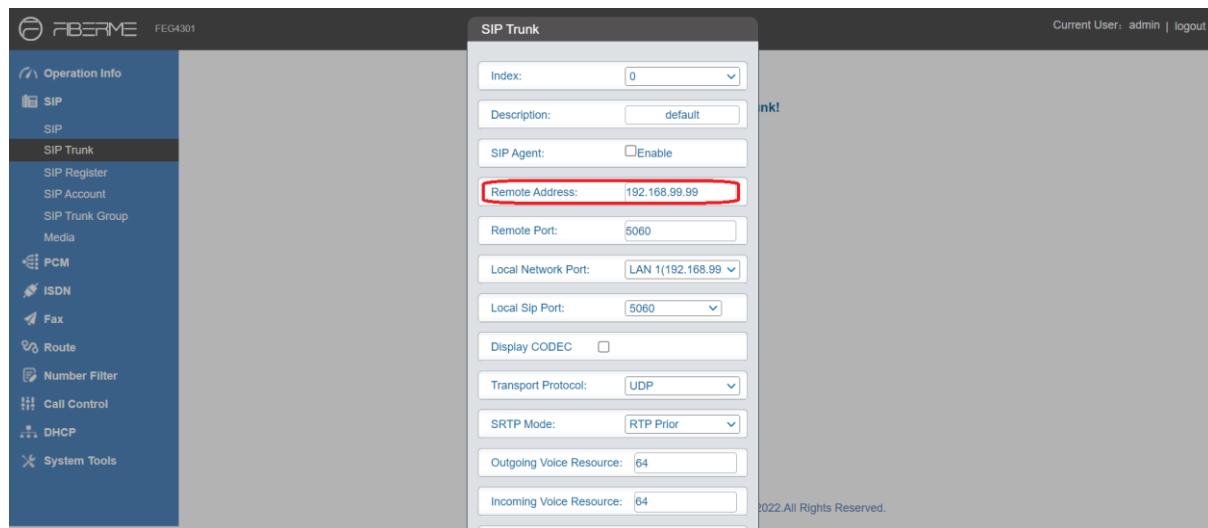

Figure 5: Connect FEG4301 with FCM630A: Remote Address

2. Go to the **VoIP->SIP Trunk Group** page and click on **Add New** button. Then check on the trunk we've created.

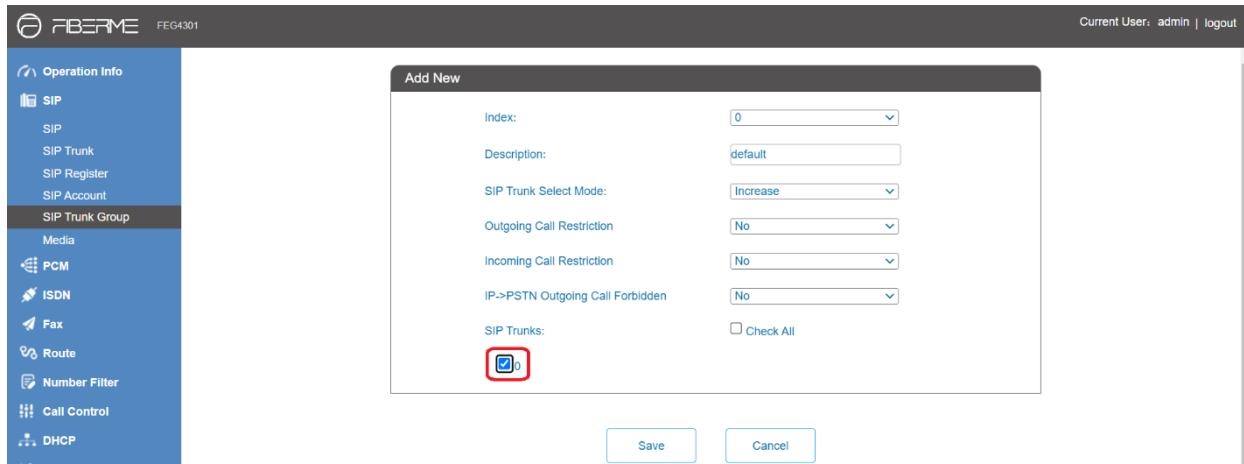

Figure 6: Connect FEG4301 with FCM630A: SIP Trunk Group

Create PCM Trunk Group on FEG4301

1. On the FEG4301 web GUI, go to the **PCM->PCM Trunk Group** page and press “Add New”. Then, check mark on the PCM trunk.

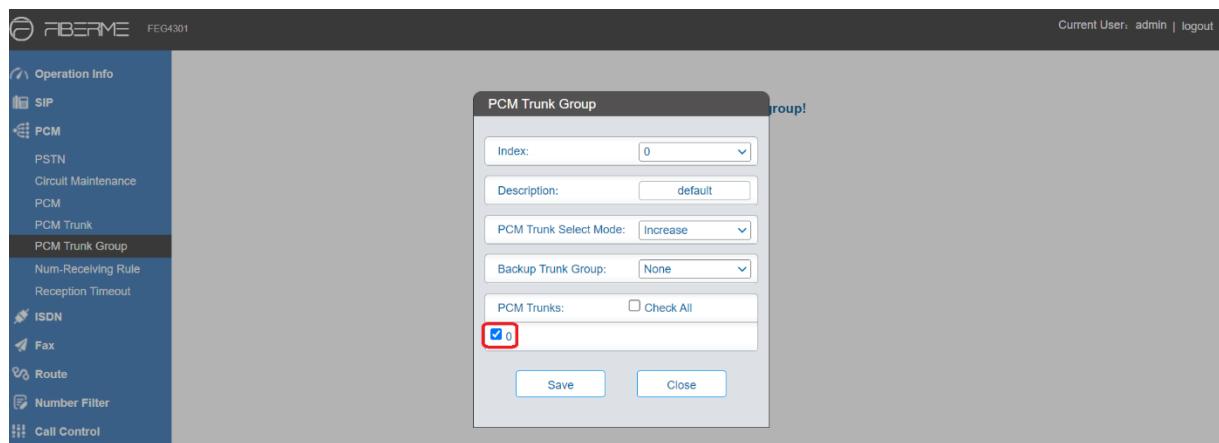

Figure 7: Create PCM Trunk Group on FEG4301

FEG4301 CALL Routing

Configure IP to PSTN on FEG4301

1. On the FEG4301 web GUI, go to the **Route-> IP→PSTN** page, Press “Add New”.

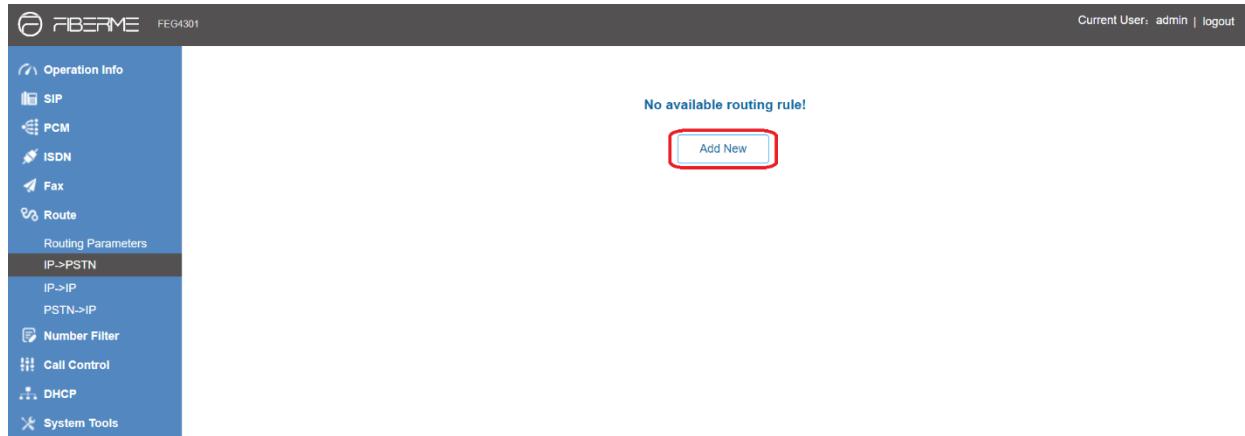

Figure 8: FEG4301 – IP to PSTN

2. Select the SIP Trunk Group in “Call Source” and the PCM Trunk Group in “Call Destination”.

Index:	255
Call Source:	SIP Trunk Group [0]
CallerID Prefix:	*
CalleeID Prefix:	*
Call Destination:	PCM Trunk Group [0]
Number Filter:	none
Description:	default

Figure 9: IP to PSTN Settings

Configure PSTN to IP on FEG4301

1. On the FEG4301 web GUI, go to the **Route-> PSTN->IP** page, Press “Add New”.

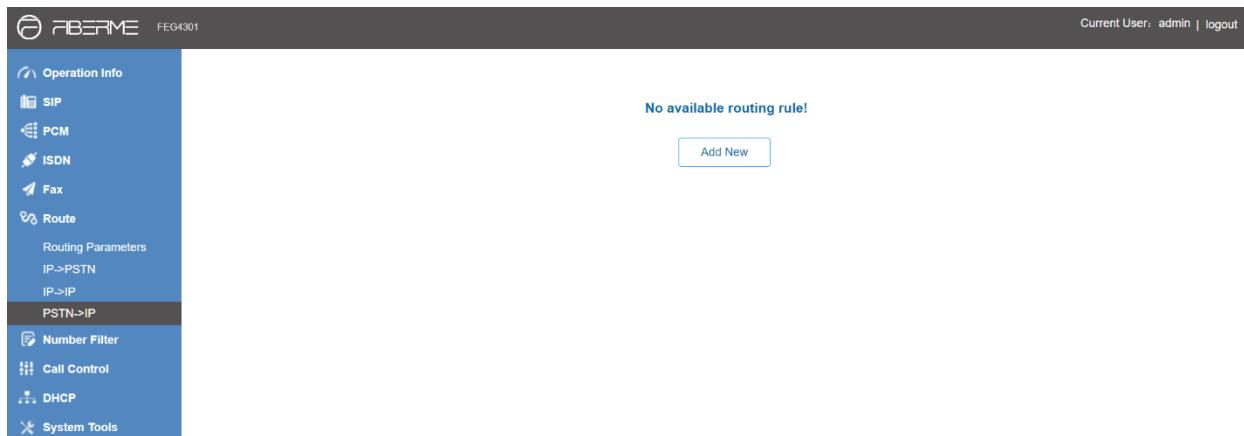

Figure 10: FEG4301 – PSTN to IP

2. Select the PCM Trunk Group in “Call Initiator” and the SIP Trunk Group in “Call Destination”.

This is a detailed view of the 'PSTN->IP Routing Rule' configuration dialog. It includes fields for Index (set to 255), Call Initiator (selected as 'PCM Trunk Group [0]'), CallerID Prefix (*), CalleeID Prefix (*), Call Destination (selected as 'SIP Trunk Group [0]'), Number Filter (set to 'none'), and Description (set to 'default'). At the bottom are 'Save' and 'Close' buttons. The 'Call Initiator' and 'Call Destination' dropdowns are specifically highlighted with red boxes.
